1. Data Processing (GDPR)

On the 25th May 2018, the EU General Data Protection Regulation (GDPR) came into effect. GDPR strengthens the rights that individuals have regarding their personal data and details your requirements concerning the storage, accuracy, security and processing of personal information you may hold. Although Acuitas is already a GDPR compliant product, some changes have been made to enhance and streamline the process.

The primary change made in Acuitas is the introduction of a new patient "Data Processing" screen. This new screen consolidates all of the existing patient communication preferences into one place and has made the opt-in/out choices more explicit, backed up by an on-screen (configurable) narrative to aid staff discussions with patients. The new screen also introduces a section for recording the patient's agreement with (or refusal of) the business's data processing policies and provides facilities for these policy documents to be printed with signed documents to be scanned and retained for reference purposes.

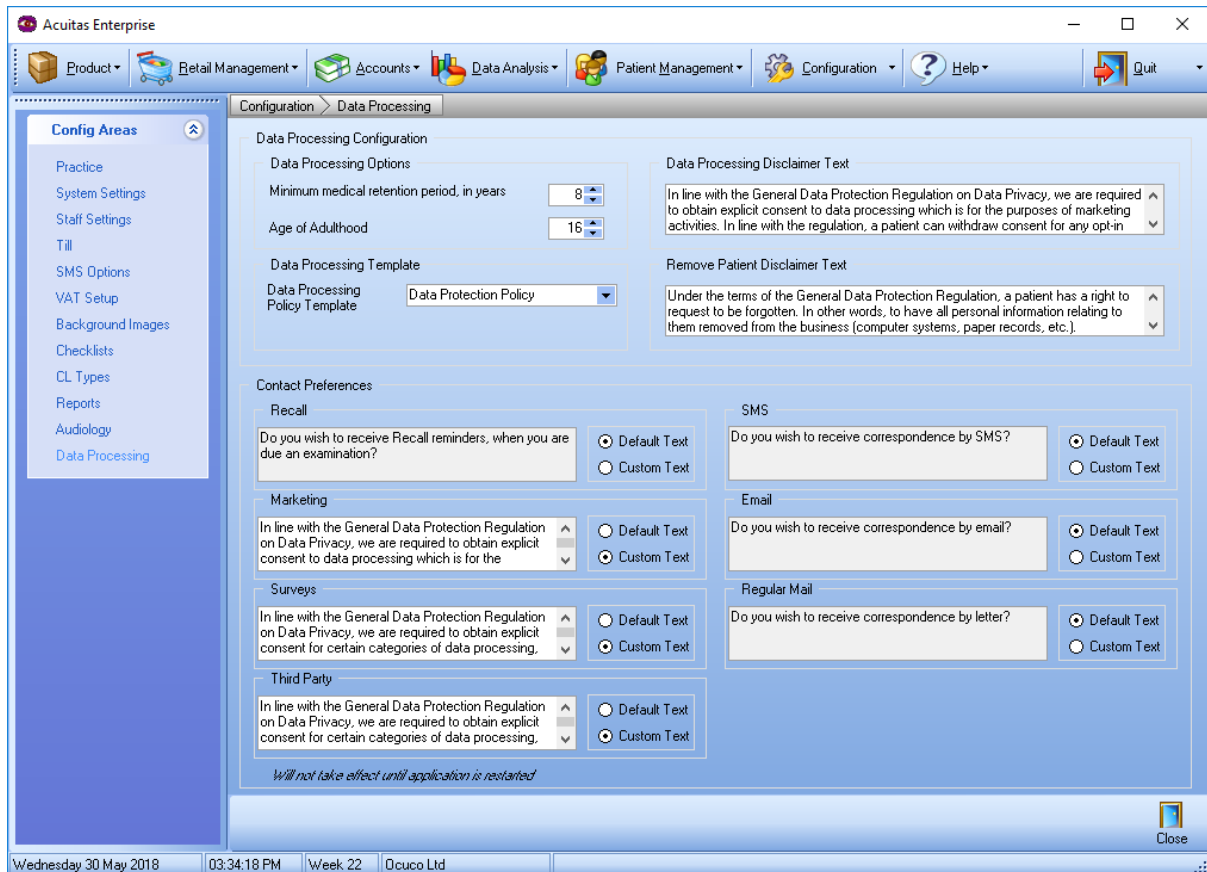

The screenshot displays the 'Acuitas Optical' software interface. The main window is titled 'Data Processing Policy' for patient 'Ackroyd, Pearl'. The patient's details include DOB (16/08/1944), gender (F), and appointment date (29/03/2018). The screen is divided into several sections:

- Data Processing Policy:** A text box explaining the requirement for explicit consent under GDPR for marketing activities. Below this is a traffic light indicator (green for 'Agreed', yellow for 'To Be Completed / Expired', red for 'Rejected') and radio buttons for 'Agreement By' (Patient, Guardian, Other). Fields for 'First Name', 'Surname', and 'Relationship' are present, along with 'Agreement Date' and 'Agreement Expiry'.
- Patient Contact Preferences:** A grid of sections with radio buttons for 'Yes' or 'No':
 - Recall:** 'Do you wish to receive Recall reminders, when you are due an examination?' (Yes selected).
 - Marketing:** 'In line with the General Data Protection Regulation on Data Privacy, we are required to obtain explicit consent to data processing which is for the purposes of marketing' (Yes selected).
 - Surveys:** 'In line with the General Data Protection Regulation on Data Privacy, we are required to obtain explicit consent for certain categories of data processing, including visit' (Yes selected).
 - Third Party:** 'In line with the General Data Protection Regulation on Data Privacy, we are required to obtain explicit consent for certain categories of data processing, including where' (No selected).
- SMS:** 'Do you wish to receive correspondence by SMS?' (Yes selected). A phone number field contains '0834026582'.
- Email:** 'Do you wish to receive correspondence by email?' (No selected). An email address field contains 'aoife.corbett@ocuco.com'.
- Regular Mail:** 'Do you wish to receive correspondence by letter?' (No selected).
- Preferred Contact Method:** A dropdown menu.
- Preferred Recall Method:** A dropdown menu set to 'Letter'.

At the bottom, there are buttons for 'Print DPP', 'Agree', 'Reject', 'Scan Policy', and 'Email Policy'. The status bar at the very bottom shows the date 'Wednesday 30 May 2018', time '03:30:14 PM', and user 'Sunny Bharaj'.

It is possible for the patient to request their data and ask to remove their data. Removing patient data is a permanent removal of the patient and cannot be reversed.

Facilitating the new patient Data Processing screen is a configuration area which allows the business to control/set up some of the aspects of how the data processing policies work and the text to be shown on the screen regarding the opt-in/out choices.

2. Supplier Integration (ZEISS)

Acuitas can now automatically submit lens orders directly to ZEISS. These orders are sent automatically as well as receiving automatic updates periodically; this helps the practice to speed up the ordering process and reduces the number of manual errors. ZEISS will also periodically provide updates to their catalogue that are automatically loaded into Acuitas so that businesses can keep up to date with the latest ZEISS products.

3. Supplier Integration (De Rigo)

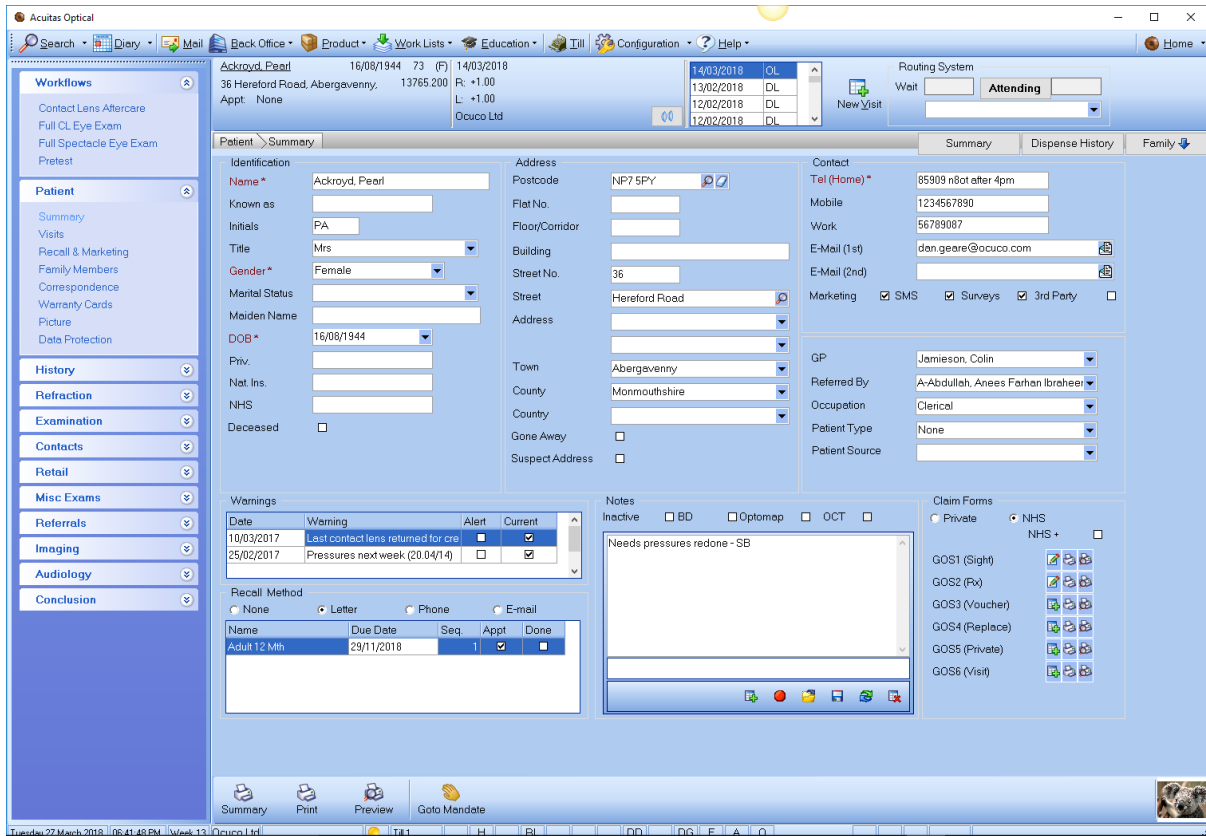

The frame supplier De Rigo have teamed up with Ocuco to offer a unique service. Acuitas integrates with De Rigo to allow the following:

- Automated stock replenishment
- Automatic download and update of the De Rigo catalogue
- Electronic delivery notes for products shipped to store by De Rigo
- Automatic product assortment per store
- Slow moving stock automatically recalled and replaced by new stock mitigating risks to the business

Automatic notifications of processing results and exceptions via email

4. Screen Scaling

Historically, we designed the Acuitas screen for a fixed size of 1024 x 768. Monitors are now capable of higher resolutions and other formats such as widescreen. Acuitas can now adjust its layout to cater for your screen size dynamically.

5. Upgrade Notification

When Acuitas is upgraded, we notify each user that they are running a new version and can view the latest version highlights and release notes. If the user wants to view either the version highlights or the release notes, Acuitas displays it in an internal web browser. An internet connection is required to load the information.

The screenshot shows the Acuitas Optical software interface. At the top, there is a navigation bar with 'Help > New Features'. The main content area displays a notification titled '1 Till Basket'. The text describes a new feature for handling multiple unsettled dispenses with a single payment. A 'Note' indicates this feature was introduced in an older version. Below the text is a screenshot of the 'Untendered Dispenses' window, which shows a list of items and a total amount of £ 554.69. The window includes a 'Select tender type:' section with buttons for 'Cheque', 'Cr. Note', 'Trav. Cheques', and 'Interest Free'. At the bottom of the main window, there is a cookie consent banner.

1 Till Basket

In the till module, the feature to take a collective payment for patients multiple unsettled Dispenses is now available. In the till module Dispense selection screen, a new window can be found at the bottom right. This window will display Dispenses selected for payment. Above this are the *Add* and *Delete* buttons, which are the controls for selecting Dispenses that can be grouped for one single payment. It should be noted that this feature will only allow for full payment of all the selected Dispenses and not for partial payment.

Note: This was introduced in an older version however it is a valuable feature still worth highlighting

Untendered Dispenses

Acuitas Optical

 £ 554.69

6. Expanded Help Menu

The expanded help menu now has the following added options:

- Webinars
- Add-On modules
- Version Highlights
- Version Contents

Webinars

This option allows the user to see the upcoming webinar and sign up to attend

Add-On Modules

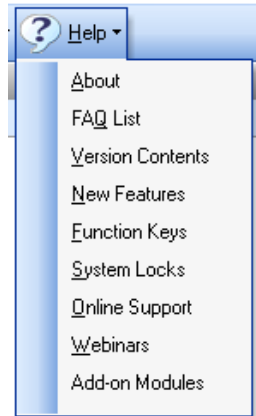

This page provides information about all the value add-ons that Acuitas has to offer. Add-ons can be added to a shopping basket and purchased. Ocuco then contacts the practice to get the add-on enabled and configured.

Version Highlights

Learn about the functionality in your new version of Acuitas.

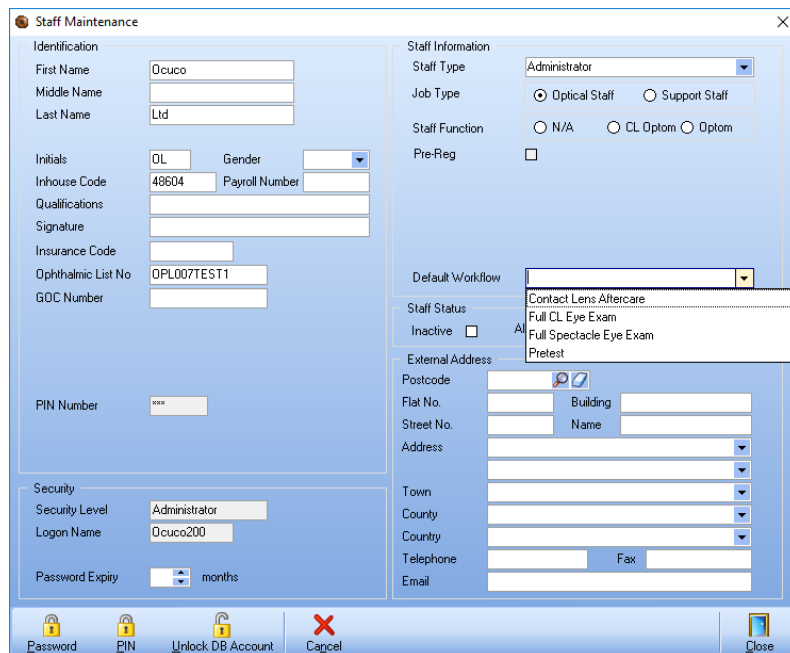

Version Contents

The version contents provide a comprehensive list of enhancements and bug fixes in your new version of Acuitas

7. Auto Open Workflow from Diary

It is possible to configure a staff member to have a specific workflow automatically open when accessing a patient's file from the diary; this is especially useful for examiners or pre-testers where a similar set of tasks are performed every time they see a patient.

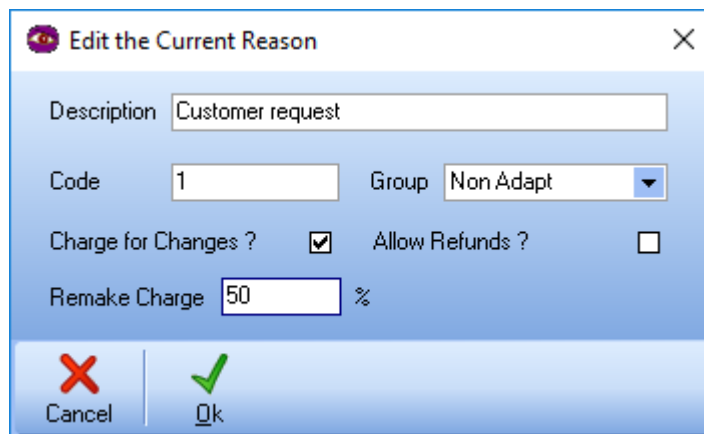

A screenshot of the 'Staff Maintenance' window in the software. The window is divided into several sections: Identification, Staff Information, Security, and External Address. The Identification section includes fields for First Name (Ocuco), Middle Name, Last Name (Ltd), Initials (OL), Gender, Inhouse Code (48604), Payroll Number, Qualifications, Signature, Insurance Code, Ophthalmic List No (OPL007TEST1), and GOC Number. The Staff Information section includes Staff Type (Administrator), Job Type (Optical Staff), Staff Function (N/A), Pre-Reg, and Default Workflow (Contact Lens Altercare). The Security section includes Security Level (Administrator), Logon Name (Ocuco200), and Password Expiry (months). The External Address section includes Postcode, Flat No., Building Name, Street No., Address, Town, County, Country, Telephone, and Fax. The window has a close button (X) in the top right corner and a toolbar at the bottom with icons for Password, PIN, Unlock DB Account, Cancel, and Close.

8. Remakes at X%

Remakes are normally carried out when a patient needs items replaced under warranty or insurance. Most of the time this is fully covered, and the patient does not have to pay any money for the remake. However, there are however some cases where some of the remakes should be chargeable to the patient.

It is now possible to configure remake reasons to charge patients a defined percentage, e.g. 50% to remake. Each remake can have a different percentage (or none at all).

Edit the Current Reason [X]

Description: Customer request

Code: 1 Group: Non Adapt

Charge for Changes? Allow Refunds?

Remake Charge: 50 %

Cancel Ok

In the example above, a remake with the reason "Customer Request," results in a charge for 50% of the retail price of the products.

9. Raw Data Extracts

An extensive set of commonly used reports have been updated to allow the export of their “raw” data; this means that the data is exported to an excel file in its unprocessed (raw) form. There is no grouping or totalling of the data; this will be especially useful for practices which need to do custom data analysis. The report data can be exported into an excel file and manipulated as needed.

The following reports have raw data extract formats:

- | | |
|--------------------------------------|--------------------------------|
| 1. Sales Breakdown | 12. Suppliers Balances |
| 2. Cash Book | 13. Creditors Balances |
| 3. Sales Reconciliation | 14. Debtors Balances |
| 4. Items by Type and Lens Type Sales | 15. Bad Debts |
| 5. Items | 16. Hospital Balances |
| 6. Promotions/Discounts Report | 17. Institution Balances |
| 7. Stock Adjustments Report | 18. Staff Balances |
| 8. Patient Sales Breakdown | 19. Unpaid Sales |
| 9. Stock Cost and Stock Listing | 20. Deposit Sales |
| 10. Exchanges, Refunds and Remakes | 21. VAT Breakdown Audit Report |
| 11. Outstanding Balance Report | |

Ocucu will add the raw data extract feature to more reports over time.

Below is an example of a raw data export of the detailed cashbook.

	A	B	C	D	E	F	G
	Payment Date	Tender Type	Staff Logon Name	Display Id	Full Name	Short Address	Totamt
2	24/11/2017	Cash	Ocucu200	15727.2	Geare, Daniel	Cwrt Y Parc, Earlswood Road, L	10

10. Electronic GOS Claim Submission (Scotland)

GOS1 forms can now be directly submitted to the eOphthalmic website via Acuitas. Electronic submission has inbuilt validation which ensures the necessary data is populated onto the forms, increasing the accuracy of the forms and therefore resulting in fewer rejections. A connection to the OWF network must still be established before submitting claims. Below is an example of a populated electronic form.

GOS(S)1 Application for an NHS eye examination

Case ID 276760000970

Patient Details

CHI Number 0608465429 Forename Nyria Surname Bailey

DoB 06/08/1946 Gender Female Previous Surname

Address 19/4 Mortonhall Road Ravelston House Park

Postcode: CV10 0PQ

Date of Previous NHS eye examination 12/08/2014

Patient's Declaration

Patient has confirmed proper entitlement to either NHS Primary or Supplementary eye examination as:

An ordinary resident of the UK

Belongs to one of the categories for exemption from NHS charges set out in the NHS (Charges to Overseas Visitors) (Scotland) Regulations 1989

Eye examination type Primary

Patient's Declaration - Primary Eye Examination

Signed? Yes No Signed By Patient Guardian/Carer

Date Signed 22/05/2017

Practitioner's Declaration

Patient was referred by: A Hospital

The Patient:

None Has Ocular Hypertension

Has Glaucoma Has Diabetes

Over 40 and Glaucoma Risk Has External Eye Disease

Has Macula Problem Binocular Vision Anomaly

Has Vitreo Retinal Problems Has Cataracts

Has Neurological disorder Blind/Partially Sighted

Patient was referred to: Not Referred

Early re-examination reason code: Patient is new to Practice

Remarks

Patient aged: Over 60 Digital Photo Taken

Domiciliary fee quantity: Please select..

I have made a domiciliary visit to conduct this eye examination at the address given in the 'Patient Details' section of this claim. The patient was unable to attend the practice for their eye examination because:

11. Patient Summary Icons

New icons have been added to the entries shown in the patient summary window, improving the readability of on-screen information where, even at a glance, the user can recognise the type of information they are looking at.

The screenshot shows a window titled "Patient Summary" with a table of medical events. Each row includes a date, a motivation, an area, and an outcome. Small icons are placed to the left of the motivation text to indicate the type of event. The table is as follows:

Date	Motivation	Area	Outcome
14/03/2018	Rx Given		R: +1.00 L: +1.00
	Visit		By: Ocucu Ltd
14/02/2018	Dispense		Total: 8.58, Discount: 0.00, Benefit: 0.00, Status: Tendered
	Purchase order		Frame, To: Luxottica, Status: Pending, Ordered:
13/02/2018	Visit		By: David Lewis
	Drug Prescription		Exocin drops Sig: 1 drop 4 times a day to both eyes
12/02/2018	Rx Given		R: +1.00 L: +1.00
	Subjective Rx		R: +1.00 L: +1.00
	Drug Prescription		Exocin drops Sig: 1 drop 4 times a day to both eyes
	Visit		By: David Lewis
	Visual Acuity		
	Visit		By: David Lewis
	Referral Out		Jamieson, Colin
29/01/2018	Private Examination		None
	Rx Given		R: +1.00 L: +1.00

At the bottom of the window, there is a toolbar with the following icons and labels: Collapse All, Expand All, Refresh, Goto, and Close.

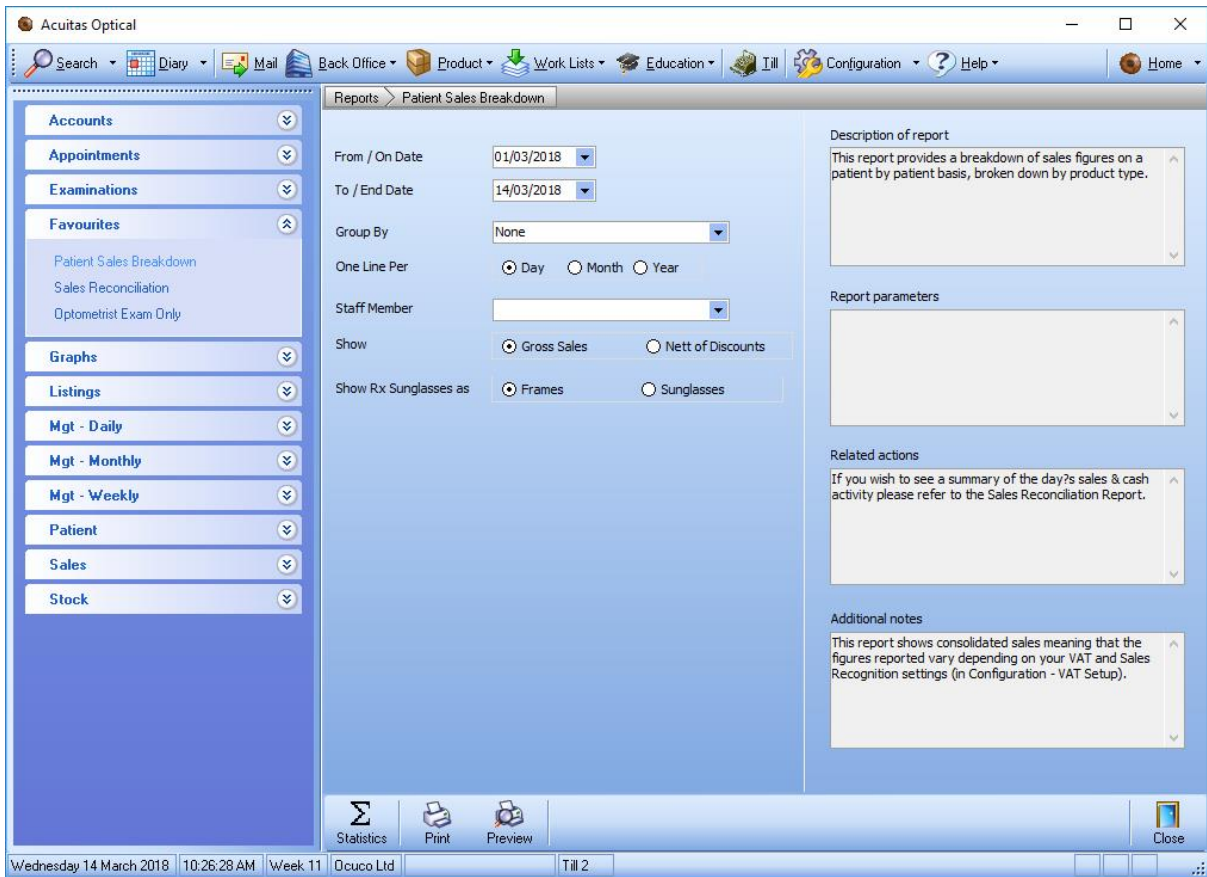

12. Favorite Reports Group

Acuitas has many different reports for different uses. All reports are categorized when created and appear under specific headers in Acuitas. Due to the large number of reports, it can be challenging to find relevant ones that the user wishes to run or uses most often. A new reports group called "Favorites" has been created. The user can add the most common reports to this group to make them easier to locate; this can also speed up the end of day process if multiple reports need to be printed.

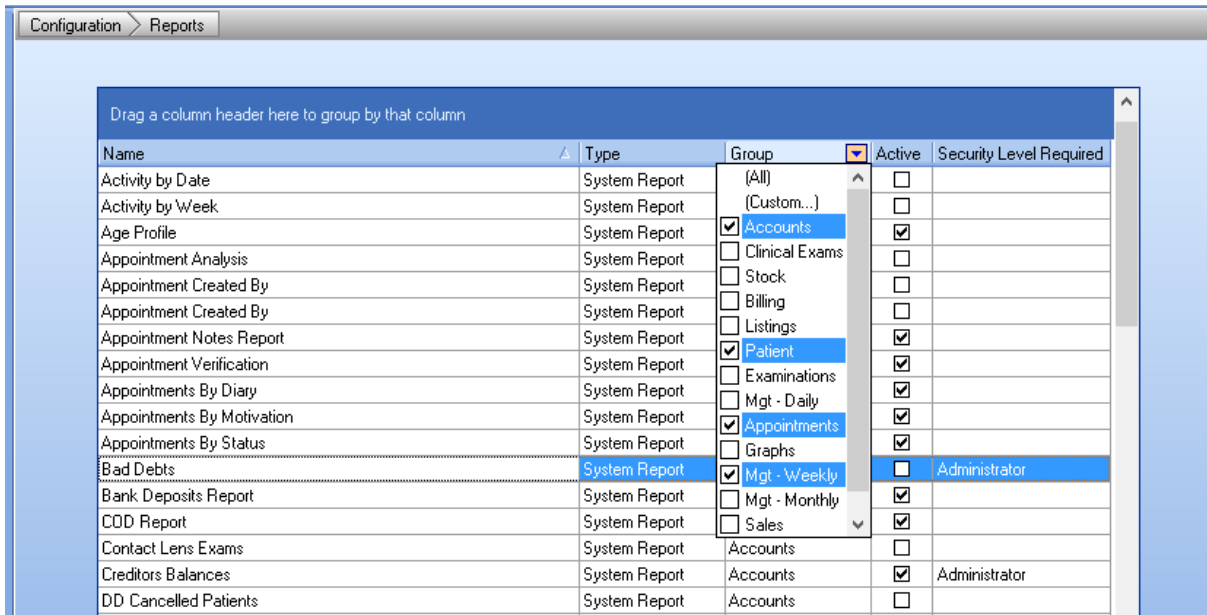

The screenshot shows the 'Acuitas Optical' software interface. The main window is titled 'Configuration > Reports'. On the left, there is a 'Config Areas' sidebar with options like Practice, System Settings, Staff Settings, Till, Cameras, SMS Options, VAT Setup, Background Images, Checklists, CL Types, Reports, and Audiology. The main area displays a table of reports with the following columns: Name, Type, Group, Active, and Security Level Required. A dropdown menu is open for the 'Recalls by Month' report, showing the 'Favourites' group selected. The table contains the following data:

Name	Type	Group	Active	Security Level Required
Payments by Staff	System Report	Billing	<input type="checkbox"/>	
Payments by Tender Type	System Report	Billing	<input type="checkbox"/>	
Petty Cash Report	System Report	Sales	<input checked="" type="checkbox"/>

Sales Breakdown	System Report	Mgt - Daily	<input checked="" type="checkbox"/>	
Sales Breakdown	System Report	Sales	<input checked="" type="checkbox"/>	Administrator
Sales Reconciliation	System Report	Mgt - Daily	<input checked="" type="checkbox"/>	

The status bar at the bottom shows: Wednesday 14 March 2018 | 10:23:17 AM | Week 11 | Ocucio Ltd | Till 2

The reports configuration grid has also been enhanced to allow filtering and ordering to make it easier to find reports.

13. Refraction Summary Screen improvements

The refraction summary screen has had several buttons added to speed up some processes for users.

Transpose will allow the user to transpose the prescription for the right, left or both eyes

Copy Previous will allow the user to copy a refraction from a previous visit

Copy To will allow the user to copy a refraction from subjective to Rx given or vice versa

The screenshot shows the Acuitas Optical software interface. The main window displays patient information for Sunny Bharaj, including date of birth (16/08/1944), gender (F), and appointment date (29/03/2018). The refraction summary is shown for both eyes (R and L) across different categories: Subjective, Auto-Refractor, Rx Given, and Retinoscopy Result. Each category has input fields for distance, near, and intermediate vision, along with astigmatism and axis. Buttons for 'Transpose', 'Copy Rx', and 'Copy Previous' are visible next to the input fields. The 'Notes' section at the bottom contains the text 'RX'. The interface also includes a sidebar with navigation options like 'Workflows', 'Patient', 'History', and 'Refraction', and a bottom toolbar with icons for 'Delete', 'Print', 'Preview', 'Previous', 'Copy Rx', 'Transpose', and 'Animations'.

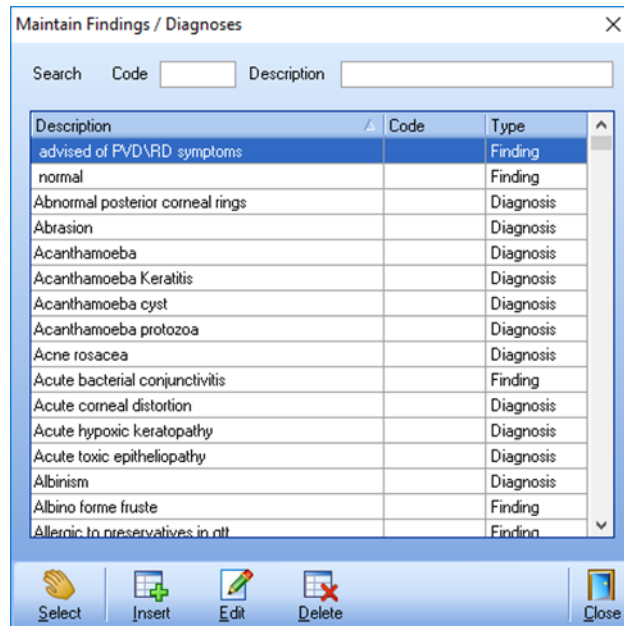

14. Clinical Improvements

A new screen that combines the patient's presenting complaint and management notes onto a single screen has been added for clinical users. The user can view and edit all related presenting complaints and management notes.

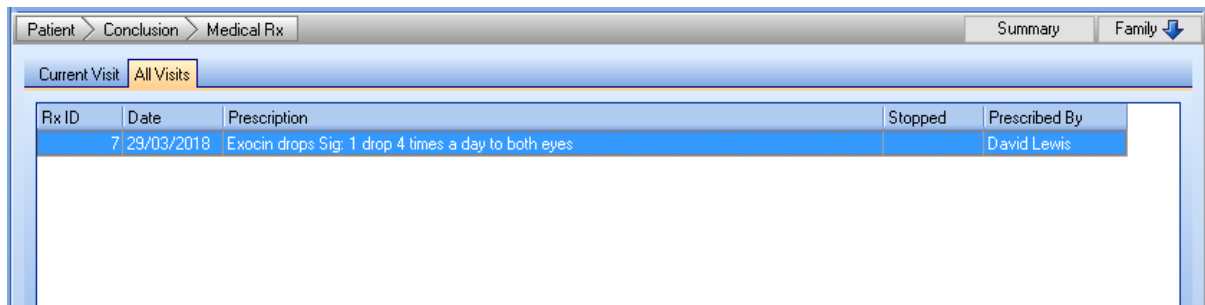

The screenshot displays the Acuitas Optical software interface. At the top, there is a menu bar with options like Search, Diary, Mail, Back Office, Product, Work Lists, Education, Configuration, and Help. Below the menu, patient information is shown, including name (Ackroyd, Pearl), date of birth (16/08/1944), gender (F), and appointment details. A table of prescriptions is visible, showing R and L eye prescriptions with various optical parameters. A sidebar on the left contains navigation options such as Workflows, Patient, History, Refraction, Examination, Contacts, Retail, Referrals, Clinical Exams, Imaging, and Audiology. The main area is divided into sections for 'Most Recent Visit' and 'All Visits'. The 'Most Recent Visit' section shows a 'Symptoms/ Presenting Complaint' field with 'Routine' entered and a 'Management Notes' field. The 'All Visits' section contains a table with columns for Date, Time, By, Presenting Complaint, Management Notes, and Treatments. The table lists several visits, including routine exams and a visit for 'Fuzzy peripheral vision, headaches' with management notes about migraines and light sensitivity.

Date	Time	By	Presenting Complaint	Management Notes	Treatments
23/03/2018	00:00	Alice Austin	Routine		
29/03/2018	00:00	Sunny Bharaj	Routine		
29/03/2018	00:00	Sunny Bharaj	Routine		
19/02/2018	09:43	Ocucoco Ltd	Fuzzy peripheral vision, headaches	couldnt do better than 6/12 Symptoms caused by migraine. Sensitive to light. Referred.	
27/01/2018	11:43	Demo User	Routine		
21/07/2017	12:00	Ocucoco Ltd	Red Eye	Very dry eye. Needs eye drops applied regularly.	
02/05/2015	12:00	David Lewis	Routine		
08/04/2014	12:00	Jaswant Joshi	Routine	Normal	

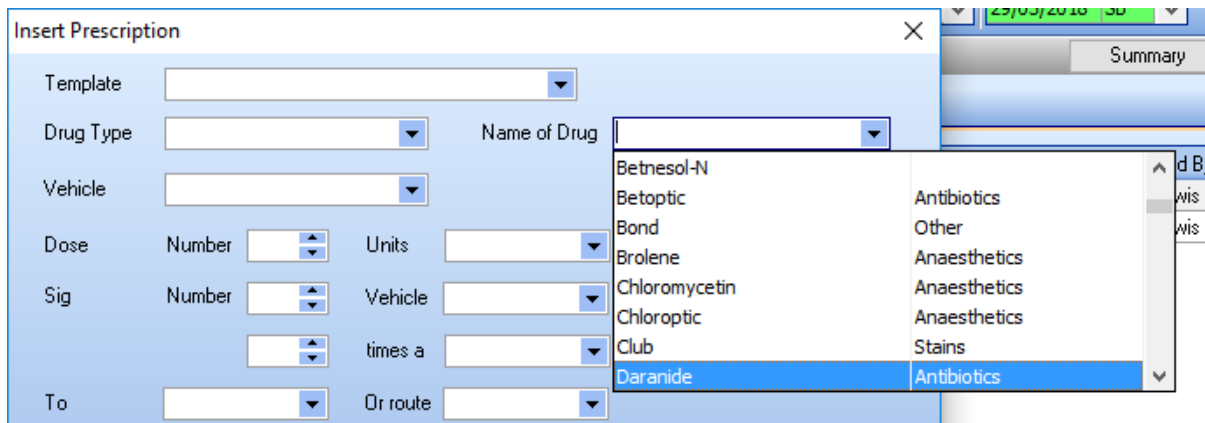

Search capabilities added to the Diagnosis and Findings maintenance screens.

Prescribed By field added to the Medical Rx grid

Drug type is shown in the drug name dropdown list

15. General Improvements

The contact lens refraction and dispense screens have a new eraser button beside the contact lens field to allow the user to clear just the selected item without clearing the refraction details.

Right
