VERSION CONTENTS REPORT

VERSION :	2.0.15.1			RELEASED :	

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
FOC-1780	Benefits	The grid columns 'Payment', 'Tax' and 'Underpaid' have been removed from the Benefit Screen Claimed tab. The columns have also been removed from the Print/Preview List report when they are not present on the current displayed grid.	Enhancement	All
FOC-2903	Benefits	In the NHS/Corporate Tracking screen, if the NHS institution was the first alphabetically, there was an error on loading the screen and no claims could be progressed for that institution.	Bug	All
FOC-3491	Benefits	On the Claim Adjustment screen, the 'Reason For Adjustment' selection control was empty so nothing could be chosen	Bug	All
FOC-3006	Bulk Updates	In the Bulk Updates screen, if the 'CL Trial Lenses' checkbox was ticked and then subsequently unticked, then, when the user selected to apply the changes an unnecessary validation message was displayed stating 'You have not selected any contact lenses to apply trial lenses updates. Are you sure you wish to continue to apply updates?'	Bug	All
FOC-2507	CL Examinations	In the clinical records, on the Contact Lens Examination screen, there is now a prompt to ask if the user wishes to overwrite the right/left details when the copy to right/left buttons are pressed.	Enhancement	All
FOC-2744	CL Refraction	In the CL Rx screen, when copying converted prescription details using the Copy Previous button, a "Field not found" error occurred.	Bug	All
FOC-2746	CL Refraction	The Dispense button in the CL Rx screen is disabled if the fitting type selection is Check-Up only. However, the button was not enabled when the user changed the fitting type to another. The fitting type will also change the status of the 'Update Recall' checkbox if the prescription date is today. If the fitting type is 'Trial' then it will be unticked, otherwise it will be ticked.	Bug	All
FOC-2748	CL Refraction	The tick box for 'Update Recall' on the contact lens prescription screen was ignoring the system setting for being auto-ticked. The tick box was also ticked for all prescriptions. This behaviour has now been changed so that it is ticked when:- 1) A new prescription or visit is being entered 2) When scrolling through the prescriptions, only the ones with todays date will have a tick (unless it is a trial type)	Bug	All
FOC-2753	CL Refraction	There was a closed dataset error in the logfiles when entering the contact lens prescription screen. No message was displayed on screen for the user.	Bug	All
FOC-3045	CL Refraction	In the contact lens prescription screen (enhanced version) if a previous prescription was copied into the new prescription then the 'update recall' checkbox became unticked	Bug	All
FOC-3256	CL Refraction	When running on a Windows 8 or Windows 10 client, the	Bug	All

		contact lens prescription screen would sometimes freeze if a part value had been typed in a dropdown control and nothing selected and then another dropdown clicked		
FOC-3334	CL Refraction	Tabs on the clinical Contact Lens RX screen were displaying with the wrong size font	Bug	All
FOC-2747	Central Maintenance	A new setting has been added that allows users to switch on validation of the contact lens material field.	Bug	All
FOC-2886	Central Maintenance	Focus 2.0 running in a Central Maintenance system now allows the viewing of the Suppliers List in the Configuration/Product menu	Enhancement	All
FOC-3036	Central Maintenance	In the Central Maintenance Recall Screen the letter name was missing from the selected patient recall history list.	Bug	All
FOC-3038	Central Maintenance	In Central Maintenance in the Recall Screen, when selecting the print screen for the first time, the Print and Preview buttons were not enabled	Bug	All
FOC-3186	Clinical Records	In the handover screen, if a visit was converted from Focus 1.0, then sometimes the 'examined by' optometrist was missing. This then forced the user to enter a valid optometrist for the examined by field. Validation rules have now been changed so that converted visits will not have this problem.	Bug	All
FOC-3426	Clinical Records	The Outstanding Handovers worklist screen contained grid columns for the Visit Origin and Outcome. These were both displaying internal numbers (from 1 to 5) instead of the actual text values those numbers relate to.	Bug	All
FOC-783	Communicatio History	(Clinical Only) A new 'Communications History' screen has been added into Focus 2.0. The Letter button on the left hand toolbar now has a dropdown menu with the option for this new screen. If the Letter button is pressed without clicking on the dropdown arrow, the Letters screen is the default.	Enhancement	All
FOC-2829	Configuration	In the Prescription Reports section of Option Maintenance the word 'contact' was incorrectly spelt.	Bug	All
FOC-3096	Configuration	The payment method printed on the till receipt for a payment taken from a prepaid patient's account was easily confused with when a sale was being charged to account (COD). A new configuration option has been added that allows the business to configure the label to be used on the Account/COD button in the till screen and the payment method printed on the receipt.	Enhancement	All
FOC-3126	Configuration	The Prescription report located in the Rx module had a practice name which included a practice name followed by a practice number. This is now controlled by a system setting. 'REPORTS', 'INCLUDE PRACTICE NUMBER'	Bug	All
FOC-3247	Contact Lenses	In the contact lens trials screen and the contact lens dispense screen, the left eye Alpha Add control was populating with the values from the right eye lens.	Bug	All
FOC-2012	Diary	The go to appointment button will now display the diary	Bug	All

VERSION :	2.0.15.1		RELEASED :	

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
		on the correct clinic for the selected appointment		
FOC-2825	Diary	If an empty diary appointment slot was copied or cut and pasted, 'Appt Booked' type analysis codes were being created incorrectly.	Bug	All
FOC-2888	Diary	There are 2 new right-click options in the diary 1) Ad-Hoc labels/forms 2) Create referral	Enhancement	All
FOC-3616	Diary	In the Diary, using the Enter key in either the name, motivation or status drop down boxes was not selecting the highlighted row in the drop down box, either selecting nothing or the first item in th	Bug	All
FOC-2553	Dispensing	A new option called "Follow-up contact lens appointment" has been added to dispense fulfilment screen for patient order notification funcionality.	Enhancement	All
FOC-2624	Dispensing	When "Discount Tax" was applied to the dispense at the till, the Dispense record Net Amount, VAT Amount and Total Amount figures were incorrectly stored in the database.	Bug	All
FOC-2912	Dispensing	When a late benefit was adjusted and the amount was recouped to the patient account the late benefit dispense was not reopened so the money could be collected from the patient.	Bug	All
FOC-3001	Dispensing	The spectacle dispense screen gave 'missing field' errors on the lenses tab.	Bug	All
FOC-3160	Dispensing	When reviewing the content of a spectacles dispense, either from the Edit button within a new dispense, or the Review button in the dispense review or orders module, there is a delay on the retrieval of the frame trace associated with that pair. The delay will not occur everywhere and is very database dependent. The underlying problem is that the SQL is attempting to find the trace for either the dispense itself (where the trace was loaded for that dispense or an approxishape selected) or the trace from the frame library. The result is that the SQL is having to scan a very large table with an OR clause on both the dispense group ID and product enterprise ID.	Enhancement	All
FOC-3287	Dispensing	The previous spectacle dispenses dialog screen was not always showing all previous dispenses for a patient. If the Jobs screen had been accessed during the current session, the previous dispenses displayed were not correct	Bug	All
FOC-3494	Dispensing	In spectacle dispensing a search button has been added to the lens code dropdown controls. This will invoke the catalogue search dialog and will obey any lens criteria added at the top of the Lens Details tab	Enhancement	All
FOC-3495	Dispensing	New Lens Criteria selections have been added to the spectacle dispense screen. These criteria work for both the preferred lenses grid and for the lens selection dropdowns. The preferred lenses grid also now allows filtering by the Category column to aid with the management of large preferred lens collections	Enhancement	All

| VERSION : | 2.0.15.1 | | RELEASED : | |

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
		The 3 new criteria dropdowns are:- Supplier Colour Style The Lens Criteria dropdown has been renamed to Material		
FOC-3497	Dispensing	In spectacle dispensing, if a pair of lenses is selected on the Spectacles tab and a lens is selected either from the right or left lens combos, the other lens will be automatically populated with the same lens.	Enhancement	All
FOC-3581	Dispensing	In the Dispense Fulfilment screen there is an option to set the frame status to be 'None - Remote Edge' which should enforce a trace of the frame to be present. The setting for enforcing a frame trace for remote edge orders was not being loaded by Focus 2.0. This meant that it was possible to send the job without a frame trace.	Enhancement	All
FOC-3582	Dispensing	The Jobs screen has a tab called 'Rejections' which displays electronic ordering rejected jobs. A count of the number of rejected jobs has been added to this tab to act as a prompt that there has been a problem with job(s). If there are no rejected orders then no count will be displayed.	Enhancement	All
FOC-3605	Dispensing	In spectacle dispensing there is now a control for entering the frame mounting. If the frame record does not already have a mounting type, one can be entered at dispense time and that value will be saved in the frame record for future use.	Bug	All
FOC-3617	Dispensing	In spectacle dispensing, there is now the facility to add box measurement details for the chosen frame	Enhancement	All
FOC-3743	Dispensing	On the spectacle dispensing screen, when viewing a historical order from either the Jobs screen or the Dispense History screen, the frame measurements, frame mounting and freeform measurements were blank.	Bug	All
FOC-3162	GOS Forms	(Wales Only) GOS 4 form was unconfigurable because each time field alignment was changed the form used to reset the field default values.	Bug	All
FOC-3257	GOS Forms	An error " is not a valid date " was occurring when the user clicked preview on a GOS 6 form for a patient with no date of birth.	Bug	All
FOC-3462	GOS Forms	(Scotland Only) The Scottish GOS1 claims can now be submitted directly to OWF web site	Enhancement	All
FOC-2828	General	The error message when the client loses connection to the server had a spelling mistake.	Bug	All
FOC-2662	Letters	When configured to use MS Word integration as the letter template editor within the Recall module, the multi template preview would occasionally give error "Exception: Access Violation at address...". Microsoft Word Error - message handling has been improved.	Bug	All
FOC-2785	Letters	When MS Word Integration is enabled and "Referral In / Referral Out" letters was opened within the application and then the application was closed the Access Violation error was occurring.	Bug	All

VERSION :	2.0.15.1		RELEASED :	

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
FOC-457	Letters	Letter templates code has been refactored to support high-resolution images within the letter templates.	Enhancement	All
FOC-1956	Main Patient Display	A new column showing the Surgery Name has been added to the GP dropdown on the main patient screen	Enhancement	All
FOC-3182	Marketing	In the Marketing Analysis screen, the 'deleted patients' Query Parameter returned results that were the opposite of what they should have been. The Active option returned inactive patients and the Deleted option returned active patients	Bug	All
FOC-3339	Menu	A new Webinar web page has been added to the application Configuration menu, to provide the user with upcoming webinar details and a registration form.	Enhancement	All
FOC-2924	Ocuco Catalogue	At the initial use of Ocuco Lens Catalog import, users are asked if they want to decommission current products. The list of current products were missing from the screen if the EDI file format on the supplier record is not populated.	Bug	All
FOC-2940	Ocuco Lens Catalogue	When users perform an Ocuco contact lens catalog update, the application will display all new items and updated items after the update process. In previous versions the system would display the item even if no change was made. They will no longer be displayed now so that users will have a better understanding of what has been actually updated.	Enhancement	All
FOC-3738	Ordering	If an electronic spectacle order had been rejected by the supplier, the rejection reason was not being displayed in the patient orders screen	Bug	All
FOC-2033	Orders	A new setting has been added to allow the editing of dispense notes for jobs that are on the 'On Order' tab.	Enhancement	All
FOC-2931	Patient	A confirmation message was added to alert the user when they are marking patient as deceased, inactive, active, or as no longer deceased. The confirmation messages are controlled by the settings.	Enhancement	All
FOC-3447	Patient	If a patient is assigned a Recall Cancelled Reason of 'Deceased' then the DECEASED column in the PATIENTS table should be set to 1. This was not happening if the patient already had a Recall Cancelled Reason assigned to them before being changed to DECEASED.	Bug	All
FOC-3479	Patient	If the patient notes was accessed via the prompt 'This patient has an outstanding action' Focus 2.0 was not checking to see if someone else had already accessed the notes for that patient. This could lead to either new notes not being saved or a secoid notes record being created for the patient in error.	Bug	All
FOC-3406	Payment and Supply Manager	The PASM Dispatch Note was printing the gross amount rather than the discounted amount	Bug	All
FOC-2907	Payments and Supply Manager	In the Payment and Supply Manager (PASM) the files	Enhancement	All

VERSION :	2.0.15.1		RELEASED :	

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
		produced for electronic submission to Eazipay, the AUDDIS and BACs files, have been changed to match the new format and are now SHA2 Compliant.		
FOC-3218	Payments and Supply Manager	If the PASM Dispatch Screen had been used during a Focus 20 session, there was an 'Invalid Variant' error when the user tried to Quit from the app.	Bug	All
FOC-3335	Payments and Supply Manager	When Microsoft Word integration is enabled and letters were previewed in the PASM module an 'Access Violation at address' error was occurring.	Bug	All
FOC-3469	Payments and Supply Manager	A new system setting has been added to the PASM module to facilitate DD letters to use patient practice details and not the patient mandate practice details when letters get merged with the practice details.	Enhancement	All
FOC-3459	Recalls	A confirmation message was added to alert the user when they are changing Recall method to 'None' within the patient summary screen. The confirmation message is configurable.	Enhancement	All
FOC-2376	Receipts	When a dispense had a benefit and a late discount, the VAT receipt printed was not including the benefit amount in the total.	Bug	All
FOC-2609	Refraction	In the Non-Clinical version there was an internal error which could cause problems with adding multiple spectacle prescriptions on the same day and with some reports.	Bug	All
FOC-3301	Refraction	It was not possible to amend and existing prescription or create a new prescription in the Focus 2.0 Clinical Spec Rx screens as all the controls were set to be disabled.	Bug	All
FOC-762	Refraction	If a high prescription was entered in the Basic Rx or Summary tabs, the user was not prompted to enter a BVD. A new configuration option has been added to Configuration/Option Maintenance/Prescriptions to allow this prompt. There are now 2 BVD validation options in the System Options screen :- 1) To denote if validation is mandatory in the prescription screens for high prescriptions. 2) To denote if validation is mandatory in the dispensing screen for high prescriptions.	Enhancement	All
FOC-1044	Reports	A new report called 'Stock Age' is now available. This report lists the items in stock, the purchases made, and the time these have spent in stock allowing the user to detect slow moving items.	Enhancement	All
FOC-1877	Reports	The Sales Breakdown report can now be grouped by Examiner or Dispenser and the option to print Nett or Gross totals has been added to the report config options.	Enhancement	All
FOC-2385	Reports	The VAT Audit report was showing negative values under the Discounts section for late discount lines, when it should only show zeros. Negative values are no longer shown as this made the report difficult to understand.	Bug	All
FOC-2658	Reports	When only one Contact Lens prescription was populated, the Contact Lens prescription report or Contact Lens	Bug	All

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
		Handover report displayed the field names instead of being empty as per contact lens prescription.		
FOC-2830	Reports	The ZZ Report and the Cashbook Report had two checkbox options that were not applicable for these reports ("Include benefits" and "Include DD payments"). The checkboxes have been removed	Bug	All
FOC-2925	Reports	The Paid Patient Daily Sales Breakdown Report was not displaying the correct payment for sales with late discounts that were paid off by an amount that is more than the sale amount. ie, resulting in customers getting change back.	Bug	All
FOC-3043	Reports	The Sales Breakdown report and the Patient Sales Breakdown report have options that allow the reports to display either Nett of Discount or Gross Sale totals. When running the Nett of Discounts view of the reports, if the system is configured to allow for late discounts, the report totals were not excluding the late discounts as they should. In order to address this, the Nett of Discounts view of the reports have been modified to display a column called Late Discount (if the system is configured to allow for late discounts) that shows the total late discounts applied for the day, month or year (based on the selection of the 'One Line Per' option by the user) . The Discount column, and the Gross column has been removed from this view.	Bug	All
FOC-3319	Reports	The Discount By Type and Discount By Dispenser reports had a column heading of 'Date/Time' when only the date was being displayed.	Bug	All
FOC-3399	Reports	The Back Office Report Group button is now working consistently.	Bug	All
FOC-3439	Reports	In the Nett of view of the Sales Breakdown report, the VAT total of each column on the left side of the report was displaying the VAT applicable to the Gross Sale value rather than Nett Sale value.	Bug	All
FOC-3456	Reports	A new configuration option has been added to allow for the staff member's qualifications to be printed on the refraction report. 'Refraction Report', 'Add Rx Staff Qualification'	Enhancement	All
FOC-3457	Reports	The Contact Lens Rx report included a label showing the practice name and the practice number. The inclusion of the number is now controlled by a configuration option.	Enhancement	All
FOC-3463	Reports	The invoice report has been changed to allow for an optional additional footer to be printed when the invoice contains a patient's own frame.	Enhancement	All
FOC-3470	Reports	VAT Breakdown Report had two Standard VAT type entries, one line used correct VAT rate and the second one had VAT rate of 0. The VAT rate 0 was incorrectly created when a late discount was applied to a part paid dispense at the till and then put to patients account and then afterwards tendered at the suited time.	Bug	All
FOC-3471	Reports	VAT Breakdown Report had two Standard VAT type entries, one line used correct VAT rate and the second	Bug	All

VERSION :	2.0.15.1		RELEASED :	

REF	MODULE	DESCRIPTION	TYPE	COUNTRIES
		one had VAT rate of 0. The VAT rate 0 was incorrectly created when a late discount was applied to a part paid dispense at the till and then put to patients account and then afterwards tendered at the suited time.		
FOC-3539	SMS Survey	A new Patient Surveys feature has been added to Focus. To facilitate this, a new checkbox has been added to the patient screen to denote whether or not the patient has agreed to receive surveys. This can be defaulted to Yes or No for new patients depending on the setting used for whether or not new patients default to receiving SMS messages	Enhancement	All
FOC-2999	Stock and Catalogue	In the application a specific file extension attachments were not opening in Windows 10 and 'The application associated with this extension can not be determined' message was displayed.	Bug	All
FOC-3321	Stock and Catalogue	The Catalogue Search screen had a font size for rows in the grid which was slightly larger than the standard font size used in Focus 2.0	Bug	All
FOC-3484	Stock and Catalogue	The Stock Orders screen had a 'DC Orders' tab which should not have been present in Focus 2.0	Bug	All
FOC-2514	Till	A new 'basket' facility has been added to the till to allow the user to pay for multiple sales in one tendering operation.	Enhancement	All
FOC-2749	Till	The Till Receipt can now be previewed and printed from the Receipt screen when the "Send To Till" button is selected in dispensing module.	Enhancement	All
FOC-3122	Till	The application supports a configuration whereby the business can pre-select the clinic dates on which the diaries are to be available for booking. Selection of these dates can be either by inclusion (pick when available) or exclusion (pick when not available). When running in inclusion mode, single clicking on the calendar control in the diary configuration was not highlighting the date meaning that the user was only able to press the On button to select the whole month, and then turn the dates off.	Bug	All
FOC-3467	Till	There were some instances of VAT being calculated incorrectly on fees, where there were VATable fees configured on the system. This was particularly to do with where they were sold from the till as opposed to the dispense screen.	Bug	All
FOC-2862	Web Diary	If the GoTo Appointment button was used in the Web Matching screen, the next time the Diary screen was entered an Access Violation error would occur	Bug	All
FOC-3485	eGOS	There was a new feature that was added that allows Scottish customers to send GOS1 claim data electronically to the NHS via a web browser. As part of this enhancement new validation changes have been added and several labels and messages have been changed.	Bug	All
FOC-3517	eGOS	On the Scottish GOS1 claim form the labels for Partner	Enhancement	All
